

# NO CERTIFICATE = NO SALE NO EXCEPTIONS

**Legally we are not able to supply you with certain products if you do not have your certified handler compliance certificate.**

You may need a certified handler compliance certificate for purchasing certain agrichemicals or animal health products (eg. acutely toxic).

We cannot sell these products without seeing the certificate. This is due to the requirements of the Health and Safety at Work Act and WorkSafe NZ.

Check the product label or safety information for requirements.

Certified handler certification is managed by WorkSafe and certificates are issued by compliance certifiers.

Evidence of other certification is needed for Restricted to Workplace product sales.
